

5 reasons why you should keep saving into your workplace pension

1 It's your money to keep, even if you change job

All contributions are paid into a pension account in your name, so remember it's yours to keep.

2 You pay in = employer pays in + you get tax relief

You don't pay tax on your pension contributions when paying into your pension pot. In fact, the government gives tax back as tax relief.*

3 ...who doesn't love 'free' money?

Whatever money you put in to your pension will be topped up. Think of it as extra 'free' money, which is effectively a pay rise.*

4 The State Pension may not be enough

If you get the full State Pension, this is currently £179.60 a week – could you manage on that alone?

5 Enjoy the retirement lifestyle you want

Adding to your pension pot will help you get closer to the lifestyle you want during retirement.
