## Market commentary

Ongoing trade tensions between the US and China lead to volatility during the quarter but equities have generally delivered gains since June. Japan lead the way following local election results with the US equities also rising. Concerns over the deteriorating economic outlook lead to a change in stance by the worlds central banks. The US Federal Reserve cut interest rates and the ECB focussed on restarting quantitative easing. These responses provided comfort to equities and lead to significant gains in bond prices. The latest economic growth statistics showed the UK economy shrank by 0.2% in the second quarter. This lead to increasing expectations that the Bank of England's next interest rate change could be downwards. Brexit uncertainty has continued to be a cloud of economic growth and helped push the pound down until recent weeks. The lower exchange rate lead to some takeover activity in the UK by international firms. During the quarter currency hedging for part of the international exposure was introduced and this has offset the impact of sterling's recent rebound.
